Innovations by the Faculty in Teaching and Learning

- Faculty members provide quality study materials to enrich student's knowledge.

- Mode of teaching in our Institute is an amalgamation of the Modern Technology (e.g., Power Point Presentation, audio/visual teaching etc.)

- The faculty shares the study material among the students via Google Classroom, websites, hand-outs, videos available in the drive etc.

- Faculties shares the PPT's for their subject topic with the current scenario in terms of development and applications to enhance the student knowledge. Additional NPTEL lectures and other virtual platform lectures are discussed.

- The college library is the best place to go for self-education. The college library is preferred place for students' syllabus-related needs, but it also has a more number of titles and volumes by prominent national and worldwide authors on a wide range of themes that students can use to sharpen and widen their knowledge. Students can also access a variety of magazines and periodicals relevant to many disciplines of science and technology at the library.

- Students are encouraged to delivery seminars on current trends in their field of interest and recent development.

- Students frequently use the digital library with internet facility to access various types of e-contents for

their knowledge enhancement.

- Students are encouraged to compete in numerous technological innovation challenges in order to improve their innovative thinking skills.

- Soft Skill classes are routinely organized by the CPD cell with the assistant of SSTP – training division (SSTP) to improve students' communication skills, interpersonal skills in order to prepare them for the professional world.

- Faculty members are encouraged to publish more papers in reputed journals, which help them to keep themselves updated in current technological developments.

- To ensure dynamic teaching learning staff members are delivering using indirect assessment tools such as quizzes, and Digital – audio and video based Lectures.

- Demonstration of Products

  Projects made by senior students guided by faculty members are exhibited in the classroom while teaching subjects including Web Technologies, Java Programming, Python programming and Mobile App Development. The purpose of product demonstration is to allow students to practice teamwork and communication skills while explaining the project to internal and external examiners. This strategy also serves as a motivator for pupils to embark on difficult undertakings. Demonstrating the syntax and runtime issues that may arise while executing the project will assist students in gaining a thorough understanding of how to construct the project.

- Audio/Visual Presentations

  Video and power point presentation plays an effective interaction with the students and helps in overcoming the difficulty in drawing on the board. The slides are constructed in such a way that the entire content of the chapter included in the slides, along with the aforementioned diagrams, and they are shared with the students for the references.

- Guest Lectures: Lectures on emerging technologies will be given by industry experts/academic guest speakers. Students gain exposure to industry-oriented innovations as well as views on the expertising areas expertise during these lectures. The significant advantage of having Guest speakers may improve the educational experience of the students.

- Online Resources: Virtual learning plays a vital role among the faculty members and students due to rapid development in the technology. The virtual learning guides the students to overcome the difficulty faced during the class lectures. Students are encouraged in various online courses offered by AICTE, NPTEL, Alison, Bright talk and Udemy courses related to their subjects such as Introduction to Programming in C, Data Structures and Algorithms using Python Programming and Introduction to DBMS have been completed by both the students and the faculty members.

- Google Classrooms: Students can access their class handouts and videos through Google Classrooms and they are encouraged to submit course assignments. The grades will be updated by the respective course Instructor.

- Innovative Workshops:
- Innovation in the technology plays a major role in molding the students with the gap faced by the industry with the academics. Hence, Workshops are held for students to broaden their knowledge of advanced technologies such as Artificial Intelligence, Android, and programming languages such as Python and C.

Environment friendly initiative undertaken in the campus.

A Campus is a place where environmentally friendly practices and education combine to encourage sustainable and eco-friendly practices in the campus. Greening the campus is all about sweeping away wasteful inefficiencies and using conventional sources of energy for its daily power needs, correct disposal handling, purchase of environment friendly supplies and effective recycling program. Our college campus is well known for green initiatives, visitors, parents and the students will feel pleasent. Plantation of saplings is the regular activities in our campus. National Service Scheme (NSS) and Youth Red Cross (YRC) volunteers are the major role players in the green initiatives. The usage of plastic materials was strictly banned. The parking area of our campus for 4-wheeler and 2- wheeler are well designated. As an alternative step staff and students are encouraged bicycling between the inter-buildings of the campus. The shade giving trees are nursed and developed and this is the continuous process which inculcates the ecosystems in and around the campus. More Green Initiatives are being planned for wastewater treatment as well as recycling and rainwater harvesting in a decentralized manner. It has shown remarkable awareness in maintaining an eco-friendly campus. Indeed, viewing the lush green lawns, labelling the trees on the basis of botanical names. Some of the measures taken under the Green Initiatives are as follows:

- Making the campus a litter-free zone.
- Use of bicycles by the faculty members and staff so as to avoid excess of air pollution.
- Paper free campus
- Planting trees on a regular basis.
- Placing of different dustbins in each and every corner.
- Making the campus a plastic-free zone.
